Education

- **Westmont College** — Santa Barbara, CA
  B.S. Computer Science, B.S. Data Analytics | Minor: Philosophy — *Expected 2027*

Leadership & Entrepreneurship

- **LittleLamb Nannies** — Santa Barbara, CA
  Co-Founder & Technical Lead — *[April 2026] – Present*
  - **Product**: Co-founding a nanny placement platform, leading all technical development while co-founder Lucy Behringer directs brand and operations.
  - **Engineering**: Building the platform using React, TypeScript, Vite, and Firebase, including a full design system and published site.
  - **AI-Assisted Development**: Set up and directed autonomous agentic workflows with Claude Code to accelerate the build.
  - **Strategy**: Rebranded the venture from an earlier concept and led early-stage work including the business one-pager, user flows, wireframes, and product specification review.
- **Emcee, Westmont Impact Conference (6th Annual)**: Hosted the conference and introduced keynote speaker Dr. Alison Lee, Chief R&D Officer at The Rithm Project.

Experience

- **CATLab (Center for Applied Technology)** — Santa Barbara, CA
  Sales Development Representative Intern — *[May 2026] – Present*
  - **Outreach**: Conduct outreach to companies, alumni donors, and prospective students on behalf of the director, drafting introductory and follow-up email campaigns.
  - **Sales Infrastructure**: Built Excel-based pipeline workbooks and a Google Sheets priority dashboard to coordinate outreach across a team of SDRs; developed CRM workflows in Excel and Salesforce.
  - **Sales Strategy**: Researched the competitive landscape of AI-native CRMs and agent orchestration patterns for outreach automation.
  - **Market Research**: Researched the Santa Barbara technology company landscape to build an internship pipeline.
- **Anodos Advisors** — Santa Barbara, CA
  Web Scraping Developer — *Jun 2024 – Aug 2024*
  - **Data Collection**: Designed and implemented Python-based web scraping tools to collect data from over 7,000 CFPs, ensuring accuracy and completeness of information.
  - **Automation**: Developed automated pipelines using BeautifulSoup and Selenium to extract and structure contact information into Excel and databases, improving efficiency.
  - **Data Processing**: Utilized Pandas for data cleaning, transformation, and organization, ensuring high data integrity and usability for analysis.
- **4H Media Life Sciences Solutions** — La Jolla, CA
  Analytics Intern — *Sep 2023 – Jun 2024*
  - **Data Analysis**: Conducted statistical analysis of pharmaceutical clinical trial datasets using Python and Excel, providing actionable insights to stakeholders.
  - **Visualization**: Created detailed data visualizations using Matplotlib to present findings clearly and support strategic decision-making.
  - **Market Research**: Performed competitor analysis and market research to assess product-market fit and identify emerging industry trends.
- **Westmont College** — Santa Barbara, CA
  IT Manager – Jobscan — *Jan 2025 – Present*

- **System Management**: Oversaw the performance of an AI-powered resume optimization platform, ensuring smooth operation for students and faculty.
- **Technical Support**: Provided troubleshooting and user support while assisting with feature enhancements and issue resolution.

- **Coral Casino Beach and Cabana Club** Montecito, CA
  Host *Jan 2024 – May 2024*
  - **Client Relations**: Delivered high-touch hospitality to an exclusive membership clientele, building rapport quickly and ensuring every guest interaction reflected the club's premium standards.
  - **Communication & Coordination**: Acted as the primary point of contact between guests, kitchen, and serving staff while managing competing priorities in a fast-paced environment.
  - **Problem Solving**: Resolved guest concerns professionally, turning challenging situations into positive outcomes while maintaining exceptional service.

Projects

- **LittleLamb Nannies**: Nanny placement platform (see Leadership & Entrepreneurship above for full detail).
- **Hanoi Estate Settlement Application**: Worked on a team to develop a full-stack application using React and Ruby on Rails to facilitate estate asset management and distribution.
- **Web Scraping Tool with Pandas**: Designed a scalable web scraping tool utilizing Python, BeautifulSoup, and Pandas to extract and analyze large datasets from multiple sources.

Technical Skills

- **Languages:** Python, MySQL, Assembly, Ruby, Java, C, JavaScript, React, TypeScript
- **Technologies:** Ruby on Rails, React, Vite, Firebase, Pandas, BeautifulSoup, Godot
- **Sales & Ops Tools:** Salesforce, Smartsheet, Google Workspace, Claude Code / Claude agent workflows
- **Development:** Full-Stack Web Development, Data Analysis, Web Scraping, Data Visualization, Product Design

Interests

- Philosophy & theology (minor coursework; independent writing on biblical and philosophical texts) — Entrepreneurship & sales — AI-assisted software development
